Closing Out Summer Goods—McFarland, Smith & Co.

Proposals for Grading—Street Committee.

Meeting of Titusville Lodge, No. 126, D. O. H.

Wanted—A Good Cook at the Bush House.

Wanted—A Good and Two Girls—Enquire at the Bennett House.

Residence For Sale—A. W. Barry.

GOLD CONGRESSED AT 1204; closed at 118 1/2.

CONGRESSIONAL.—The Congressional conference will not meet at Greenville, as reported. The place of meeting has not yet been agreed upon.

BURGULAR FOUND.—It is reported that the burglar mentioned in our yesterday's issue has been caught in Corry, but no certain news in regard to it has yet reached us.

PERSONAL.—Our fellow townsman, Capt. B. N. Hard, leaves for Syracuse, N. Y., to-day, to participate in a Soldiers' Re-union of regiments raised in Onondaga county during the war. Mr. Hard is one of the officers of the day.

THE LATEST NEWS for a square drink at Miller Farm is "Chassepot Cocktail," a whisky-straight is termed a "Needle-gun Cocktail." Neither is so readily in effect as the West Hickory "Mittler's," or a liquid combination of gin and rattle-snake milk.

A GERMAN PICNIC is to be given in honor of wounded soldiers of the German army, at Clark farm, Shamberg, on Wednesday, August 10th. There will be music and dancing, and a beautiful collation for all visitors. If the weather prove favorable there will be a large attendance from all neighboring points. The price of tickets is one dollar.

UNION AND TITUSVILLE RAILROAD.—A new route for this road is being surveyed on the south side of Oil Creek, between Titusville and Centerville. By this route the road would pass through Tryonville, and the grade is easier than by the old route. The remainder of the route would conform to the original survey, passing along the west branch of Oil Creek to Riceville, &c.

TO BE EXTENDED TO ERIE.—The Erie Republican says:—"We learn that the arrangements for the construction of the projected Railroad from the oil regions to this city, under the management of the Casement Brothers, have so far been completed that it is expected that part of the line from Union to Titusville will be finished in thirty days, and that the main line from Union to Erie will be done before the first of the coming year."

A DANGEROUS COUNTERFEIT.—A dangerous \$20 counterfeit is in circulation. All the notes so far discovered are evidently printed from the same plate, which is remarkably well engraved. The name of the bank differs in every case, this portion of the plate being evidently left blank, and various times introduced, so as to better avoid detection. The only noticeable bluish in the notes is a slightly blotted appearance, in the vignette, and an inferiority in the paper.

RUNAWAYS.—Saturday evening last was marked by several runaway accidents, which, though not resulting seriously, caused a panic in the vicinity of their occurrence. An old gentleman while proceeding leisurely in the direction of Tryonville, observed, when near the outskirts of the city, signs of fractiousness in his usually staid horse, and a few minutes later he might have been seen standing on his head in the ditch, with both ears full of sand, while the "old family horse" struck into a gallop that would find few equals, save at the Buffalo races. No bones were broken, but the victim's stove-pipe hat, which had stood the frosts of several seasons, looked like a buckwheat cake after being exposed to a French "Mittler's."

A horse attached to a covered buggy became frightened at the effects of the worm killer's medicines, at the junction of Spring and Diamond streets, and rushed violently into the crowd, knocking several persons down, but otherwise inflicting little damage.

A span of horses standing near the American House, about six o'clock Saturday evening, became demoralized at the Broadway-like throng passing, and in their movements broke through the glass in the pavement before Goodwin's restaurant, and were only prevented from going into the cellar by the timber cross pieces below the glass.

WANTED—A good girl at the Mansion House.

EVERY SATURDAY

at Howe's.

POLICE ITEMS.—G. W. Durand and A. B. Rockwood engaged in a little round at the Four Corners yesterday, and were parted by officer Doherty. Rockwood then applied to Justice Perry and obtained a warrant on which Durand was arrested. He was fined \$5 and costs, on the payment of which he was discharged.

Officers Rouse and Doherty in their stroll through Water street found a man lying in the gutter, very drunk, soaked through and through with mud and water, his head covered with a quilt which some humane resident in that vicinity had furnished. They roused him up and started him for his home, which lies in the direction of Watson's flats.

Fred. Fincker was arrested on the charge of having stolen a watch from the vest of E. Coons on Saturday. Coons was employed as a carpenter on the building which is being put up by Mr. John S. Lowry, and the watch was abstracted from his suspended vest by the furtive Fred. On his arraignment before Justice Strouse he pleaded guilty and characterized hanger, as the stern necessity causing this infraction of the law. Owing to these extenuating circumstances the Justice has his case still under consideration.

A saloon at the corner of Franklin and Water streets, kept by Martin Lutz, was closed yesterday by the order of Chief of Police Rouse, on account of a row happening there.

About a quarter of eleven last night a man was found lying across the sidewalk on Franklin street, in front of Collins & Porter's store. The officer attempted to take him to the lockup, when he made such resistance that he was forced to call citizens to his assistance and put handcuffs upon him when he succeeded in conveying him thither.

DUNKIRK & WARREN RAILROAD.—

Last winter, the New York Legislature by the decision of 107 to 3, passed an act compelling the towns in New York State and on the line of the Dunkirk & Warren Railroad to issue bonds in aid of the project.

Governor Hoffman immediately signed the bill and it became the law. This was considered an act of justice to the towns which had already contributed liberally toward the completion of the work. The road was immediately placed under contract to be completed early in 1871. The town of Stockton refused to issue its bonds as required by law and we are now informed by special telegram that the Supreme Court of New York has decided the law unconstitutional, thus relieving the town from the payment of some \$34,000. This decision will probably offer a serious impediment to the success of the enterprise.

A CHALLENGE TO CHAIRVOYANTS.—Among the many wonders claimed by clairvoyance or somnambulism, is the faculty of sight without the use of the organs of vision. A contributor to the July number of the *Journal of Psychological Medicine*, (Dr. Schwabe), in treating of Modern superstition, observes that wear of "times innumerable when the artifice has been performed of reading sealed letters laid upon the chest. It is therefore a cause of great wonder that the premium of ten thousand francs, which the Paris Academy of Science offered more than forty years ago has never yet been claimed. That sum, it is known, was promised to any somnambulist who will prove herself able to read, before a committee of the Academy, a sealed document prepared and laid upon her chest by the former. As I stated, this premium has not been claimed yet, and, if I am rightly informed, not a single somnambulist has within this long time ever applied for the opportunity of submitting to that examination, in spite of all public advertisements. I suppose the somnambulist themselves know best, that it requires some preparations in order to read a sealed letter with the stomach, and above all, that they must know beforehand the contents of such letter."

If, however, the matter is susceptible of proof, why is not the bounty offered by the French Academy claimed, and the singular magnetic phenomena in question brought into the domain of well attested scientific facts?

NEW BANKS.—From present appearances, the Legislature of Pennsylvania will be asked at its next session, to incorporate a number of banks, under the general banking laws of the State. Notices of such intended applications have to be published at Harrisburg six months before the session begins. We observe notices of one bank at Pittsburgh, of a capital of \$100,000, with the right to increase to \$1,000,000; one at Chester, one at Harrisburg, one at Columbia, one at Phoenixville and one at Sharon. The list of proposed new banks for Philadelphia is as follows:

Name	Capital	May be increased to
U. S. Banking Co.	\$1,000,000	\$5,000,000
Chesnut Street	100,000	500,000
National	100,000	1,000,000
Union	100,000	500,000
Bank of the City	100,000	500,000
Bank of the State	100,000	500,000
Bank of the Commonwealth	100,000	500,000
Bank of the People	100,000	500,000
Bank of the Merchants	100,000	500,000
Bank of the Farmers	100,000	500,000
Bank of the Laborers	100,000	500,000
Bank of the Soldiers	100,000	500,000
Bank of the Sailors	100,000	500,000
Bank of the Fishermen	100,000	500,000
Bank of the Hunters	100,000	500,000
Bank of the Farmers	100,000	500,000
Bank of the Laborers	100,000	500,000
Bank of the Soldiers	100,000	500,000
Bank of the Sailors	100,000	500,000
Bank of the Fishermen	100,000	500,000
Bank of the Hunters	100,000	500,000

Here we have a proposed addition to the banking capital of the city of Philadelphia of nearly two millions, which may be increased to over nine millions. It is evidently the opinion of those seeking for the charters that banking, under the State laws, is a very profitable business.

PETROLEUM PRODUCERS' ASSOCIATION. The regular monthly meeting of this Association will be held at Library Hall, in Oil City, on Wednesday, August 10th, 1870, at 10 o'clock, a. m.

A full attendance of members is desired as this is the meeting at which nomination of officers for the coming year are to be made, amendments to the constitution proposed and other business of importance will be brought before the meeting.

WM. BROUGH, Pres.

MUSICAL.—The Tyrolean Troupe, which has been delighting the "munity at St. John's Hotel for the past week with Swiss melodies, left last evening for Scranton, Pa., where it will fill an engagement of four weeks.

"ALL the colliers under way," is the welcome news from Schuylkill county. The shipments, according to the *Miner's Journal*, have been more than double this week, and next week they will be unusually large.

THE LESSON OF A YEAR.

BY CORA L. TAPPAN.

Between the rising and the setting of the sun I passed the first good work week of the year. When Phobos in the moon-cumpled East Spread all his golden fruitage for day's feast From out a serene brilliant train To open wide the gates of Orient—

With voices soft and shining maiden's hair, With moments mellow, sinking to early rest, The hours of the year were passing—

I saw them perish and no good work done Between the rising and the setting of the sun.

Between the dawning and the ebbing of the tide I passed the first good work week of the year. Since for the loveliness and use of earth All truth and goodness must have higher birth, And to the wide arms of the rising and the setting of the sun—

Wound sinuously 'mong the solving caves, And white ships strained their white wings to the sea.

Then all was dark between high Heaven and man; For ways were not which wandering would appear, The sails were snatched each morn'g sent, And nought of all that heavy could abide Between the dawning and the ebbing of the tide, Because, because just as never done Between the rising and the setting of the sun.

Between the spring time and the autumn were I passed the first good work week of the year. I saw the sowers sow, the sun and rain Refreshed, replenished the hill and plain, Each to his task in true and fair intent, And planted seeds of strange and varied worth: The blight round the earth and air went forth, All brown and bare the fields in waiting lay, And the clouds were gathering old and gray.

No golden sheaves were growing old and gray; Between the spring time and the autumn were I passed the first good work week of the year. Between the rising and the setting of the sun.

Between the setting and the rising of the sun I passed the first good work week of the year. I saw the sowers sow, the sun and rain Refreshed, replenished the hill and plain, Each to his task in true and fair intent, And planted seeds of strange and varied worth: The blight round the earth and air went forth, All brown and bare the fields in waiting lay, And the clouds were gathering old and gray.

No golden sheaves were growing old and gray; Between the spring time and the autumn were I passed the first good work week of the year. Between the rising and the setting of the sun.
